

# Jonathan Pulsipher

Salt Lake City, Utah | m: 801.557.1799 | [jonapulse@gmail.com](mailto:jonapulse@gmail.com) | [LinkedIn](#) | [Website](#)

## Unity Developer | Software Engineer

---

Versatile and technically skilled Unity/C# developer with 7+ years of experience building interactive applications across gaming, education, and AI training. Adept at front-end and systems programming, UI/UX design, and team collaboration in remote, fast-paced settings. Proven ability to deliver polished, scalable solutions for both consumer-facing and enterprise clients.

## Core Competencies

---

- Unity3D / C# Programming
- Team Leadership & Mentorship
- AI & ML Data Tools (Human-in-the-loop)
- Front-End Systems & UI Development
- User Experience & Design
- Code Quality, QA, and Agile Workflow
- AR/VR & Simulation Tools
- Quality Assurance
- Cross-Functional Remote Collaboration

## Professional Experience

---

### Scale AI | *Platinum Team Leader, Coding - Remote | Dec 2023 – Present*

- Managed a 50-person team creating AI training data across evolving project specs.
- Delivered personalized coaching and performance tracking to improve team output
- Implemented QA and feedback loops to maintain data quality and integrity
- Contributed to client satisfaction via post-delivery feedback and support.

### Square Panda | *Unity Gameplay Programmer | July 2018 – July 2019*

- Released an educational iOS/Android app supporting early literacy through games.
- Integrated analytics and localization, and supported live maintenance updates.
- Collaborated with global team to maintain consistent codebase and delivery pace.
- Ran live playtests, analyzing results and creating actionable gameplay and UI recommendations.

### Lunar Delights, Armor Games, other clients | *Freelance Unity Developer | Remote | Sept 2014 – Apr 2017, Sep 2019 – Dec 2023*

- Released multiple commercial titles across web and Steam.
- Implemented front-end of a mobile Chess variant; worked closely with a remote team to ensure timely project completion. Engineered Shop and Menu UI for a competitive online multiplayer experience, including design and incorporation of matchmaking, inventory, friend lists, time-locked events, and additional features.
- Created an ACT Test Prep mobile app for a tutoring company featuring match-3 puzzles, ACT questions, and an interactive story. Developed a system to track student performance, provide instructive feedback, and generate targeted questions; modified basic, built-in text tools to support math notation, including nested notation.
- Balanced multiple clients and projects concurrently, prioritizing tasks and pivoting quickly to address critical issues and unforeseen challenges.

### MAGIC Spell Studios LLC (CO-UP) | *Lead Game Developer | May 2017 – May 2018*

- Prototyped and pitched a game concept that was selected for funding by the studio; mobilized a team to develop and release the game (see Light Borrower below, project continued development until June 2018).
- Architected and wrote code to deliver a seamless and immersive user experience that combined puzzles, hub-worlds, and narrative artifacts, driving user excitement and positive game reviews.
- Instructed the programmer in the codebase and integrated the artist's and composer's tools into an effective production workflow, boosting efficiency and productivity.

## Education and Credentials

---

### **B.Sc. Chemistry, Minor in Creative Writing**

Stanford University - Additional coursework in Java, C++, and C

## Independent Games and Projects

---

*Unity Game Development | Creator and Main Programmer | August 2016 - July 2018*

**Light Borrower** | [https://store.steampowered.com/app/829040/Light\\_Borrower](https://store.steampowered.com/app/829040/Light_Borrower)

- A devout community weathers the apocalypse in a bomb shelter. Years later, a child raised in the dark faces her trial, solving light-based puzzles and reading through discarded documents in search of the truth. Puzzle/narrative game.
- Recruited a team; developed and managed a timeline for release, modifying as milestones were exceeded or undershot; held weekly meetings, providing feedback and guidance on team members' focus areas.

*Unity Game Development | Programmer/Designer | September 2019 - January 2020*

**Heartburn Boulevard, Programmer/Designer** | [www.jonahpulsipher.com/HeartburnBoulevard](http://www.jonahpulsipher.com/HeartburnBoulevard)

- In a sick city in the bowels of a sicker detective, microbes on both sides of the law fight to get out before everything goes down the drain. Emily Coli must split herself in two to navigate mirrored-movement puzzles. Puzzle game.
- Replaced built-in physics with a modified raycast-based character controller for precise control.

*Unity Game Development | Programmer/Designer | January 2016 – April 2017*

**Pratfall, Programmer/Designer** | *January 2016 to April 2017* | [www.jonahpulsipher.com/Pratfall](http://www.jonahpulsipher.com/Pratfall)

- Elmer the clown navigates fixed-perspective puzzles in the maze within his mind. Puzzle game.
- Built functionality and interface for a level editor designed around re-using pieces of a stage from level to level; wrote an XML parser to save and load stage info for the editor.

## Technical Proficiencies

---

- Languages: C#, Python, C++, JavaScript, HTML/CSS
- Tools: Unity3D, Git, Perforce, Plastic SCM, Wwise, Blender, React
- Platforms: iOS, Android, Steam, WebGL
- Also familiar with: Unreal Engine, Godot,

## Additional Information

---

**Languages:** English (native), Portuguese (professional working proficiency)

**Interests:** Film, Literature, Cooking, Gardening. And this one will surprise you... Video Games.
